Hi, my name is **Lindsey** and I love people!
I'm passionate about helping people live happy and healthy
lives, in almost any way that I can.
One outlet I've found is by creating essential oil sprays and
clean body products for my loved ones and friends.
And thus...
Shooting Rainbows was born.

Shooting Rainbows uses exceptionally high quality Earth-friendly ingredients: as raw, organic and as sustainable as possible, to help you live a highly vibrant toxin-free life! Seeking to create amazingly powerful & synergistic blends, using a broad range of spiritual and wellness knowledge, Shooting Rainbows wants to help YOU achieve Balance in Mind, Body and Spirit. Our inspirations come from Mother Nature, Love, Light, the Universe, and from every Person, Religion & Creed. All methods of Love and Positive Energy are used to enhance these yummy products.

There is a signature line of body and room sprays and pulse-point perfumes, and we're always developing more! We also love making custom blends, for all of your needs: mental, spiritual, functional, emotional, or to just plain smell good! Just let us know how Shooting Rainbows can help YOU!
You deserve to feel amazing and wonderful!

These products are made with the best of intentions. Before making any product, each and every ingredient is asked for its blessing and permission to use, along with giving back our heartfelt gratitude and love. We utilize the Power of Positive Intention and Thought by blessing the product with Unconditional Love & Reiki, utilizing crystals and their magnificent frequencies, charging the crystals in Sunlight and/or Moonlight for added Zing, using Dr. Masaru Emoto's research of imprinting the water with pure thoughts and words of Love, infusing them with the gentle vibrant energy of flower essences, charging each blend with their own unique healing musical frequency, having them blessed by Oneida Bear Clan Healer Dennis "Rocky" King, and by simply loving every each and every product made. These sprays are blessed and loved in small batches!
